

Top production at the LHC

Jordi Nadal*

II. Physikalisches Institut

E-mail: jordi.nadal@cern.ch

Latest LHC results of the top quark production are presented. With the focus on the ATLAS and CMS experiment I will present top quark production cross-section in the different channels and also the latest results on the single top production, giving the state-of-art measurements. I also include differential cross-section as well as top quark pair production in association with W/Z bosons.
