Ladies and gentlemen, dear colleagues, dear guests,

This is the closing talk of the 40th International Conference on High Energy Physics. It has been very different from a normal conference but let me hope that it was interesting and useful. And as usual: it could not happen without strong support and tireless effort of many people and institutions. It is impossible to list them all, but I tried (see Figures 1 and 2 and Table 1) and already now apologise to all not listed.

At the end I have to thank the C11 commission: we have been given a second chance: ICHEP2024 has been assigned to Prague and let's hope it will be a standard one.
