

Dear Reviewers,

Thank you for revising my manuscript and for the comments to improve the manuscript quality. Please find below my replies:

- the line numbers should be turned off

Done

- the limit of the number of pages is 6: you can both reduce the text in some places as well as reduce the size of references, e.g., by dropping the title.

Done

- Fig 3 left panel: even if the units are arbitrary there should be some labels like "x (a.u.)".

Done

- Spaces are needed between text and references (e.g. "project[9]" but also elsewhere).

Done

- Multiple instances of articles missing detected; please have a native english speaker from TOTEM proof read the manuscript.

The manuscript has been revised, with several grammar fixes applied

Best regards,

Edoardo Bossini
